Christine Winter, Looking After One's Own: the rise of Nationalism and the Politics of the Neuendettelsauer Mission in Australia, New Guinea and Germany (1921-1933), Germanica Pacifica, Peter Lang Verlag, 2012.

- Stewart Firth, review, *Australian Journal of Politics and History* (59, 3), 2013, pp. 477-8. The focus of this study is the political stance of the mission towards the Nazi party in the late Weimar period. The author ... is well qualified to address this issue. She has a sophisticated, critical and yet sympathetic understanding of the history of Bavarian Lutheranism and of the reasons why mission leaders ... were increasingly drawn to the doctrine of national renewal advocated by the fast-growing Nazi party in the early 1930s. .. Drawing extensively on government and missionary archives in Germany and Australia, especially those in Neuendettelsau itself, Christine Winter has written a remarkably interesting and original account of a little known aspect of the history of Weimar and Nazi Germany, one that intersects in unexpected ways with the history of Australia and New Guinea as well.
- Oliver Haag, *Reviews in Australian Studies*, Vol 8, No 2 (2014) *Looking after One's Own* is a thrilling read which shows that nationalism deeply permeated the seemingly transnational spheres of missionary activity, especially so under National Socialism. The book rests on original archival research but also offers a rich theoretical outline of nationalism and missionary activity. The author refrains from a moralising account and also reflects on her personal standpoint in the history she retraces. ... Christine Winter presents a good and cogent analysis that is of great interest to a regional and an international audience alike.

Christine Winter (co-editor), Scholars at War: Australasian Social Scientists, 1939-1945, Lives Series in Biography, ANU E-Press 2012

- Kate Darian-Smith, review, *Britain and the World*, 2013 This collection of biographical essays, ... is the first examination of the expansion of career and intellectual opportunities for many Australasian social scientists, both at home and abroad, as a direct result of wartime demands. ... These biographical case studies make this volume a welcome addition to a recent upsurge of interest in the history of universities, the tracing of academic connections and networks across the globe and the development of academic disciplines. Let us hope that further studies of Australasian intellectuals during this period will enrich this emerging historical field.
- Peter Beilharz, Scholars at War, *Australian Journal of Politics and History*, 2013, p. 9. This volume ... is the more welcome as it takes on the trans-Tasman dimensions of the story, and uses the Second World War as the frame for its early emergence and consolidation. The editors ... offer a transgenerational, as well as transnational, outsider-based critique of these earlier insiders, real and aspirant.
- Frank Bongiorno, Scholars at war: Australasian social scientists, 1939-1945 [Book Review], *The Journal of New Zealand Studies (JNZS)*, No. 13, 2012: 154-156 The essays in this collection are not examples of ancestor worship; this is critical history and biography, and a valuable contribution to the still neglected subject of Australasian intellectual history. Geoffrey Bolton's remark of over twenty years ago – 'So much Australian history is written by intellectuals, so little is written about them' – could no longer be made with the same confidence in the wake of studies such as *Scholars at War*.
- Tamson Pietsch, *Reviews in History*, Nov 2012, URL: http://www.history.ac.uk/reviews/review/1340 *Scholars at War* is a welcome contribution to recent scholarly efforts to rethink the social and institutional contexts of academic and intellectual endeavour in twentieth century Australia and New Zealand... the lives and work of these individuals ... have much to tell us about the shifting intellectual and political landscapes of the 20th century, and about the relationship between expertise and power in this period.

[The fourteen contributions to this volume deal with exciting themes and are innovative due to the authors' diverse approaches.]
- Brigitte Bönisch-Brednich, Journal of Pacific History, Vol. 46, Issue 1 (2011), pp. 144-145 The volume ... has much to offer on the chosen topic, and sheds light on the history of National Socialism in the Australian region. ... The volume is directed towards an expert audience who will be able to put these often-fascinating pieces of research into the wider framework of the history of Oceania and the impact of fascist politics and war.
- Oliver Haag, Reviews in Australian Studies, Vol 5, No 1 (2011):

National Socialism in Oceania breaks new ground ... Without exception, all the chapters are of a high quality, establishing new knowledge and providing a reliable reference point for future studies. The translations from German are flawless and the style is coherent and fluid. The inclusion of different rightwing movements and national contexts has proven to be of great advantage to understanding the intricate mechanisms of Nazi influence on a highly heterogeneous region. The consideration of individual reminiscences – particularly the inclusion of an Indigenous viewpoint – has contributed to a methodologically fresh approach. National Socialism in Oceania can be considered a landmark study for students and researchers alike.
